NORADICA Learning for Teaching Tools - Interactive Web-app for teachers

Partners developed an interactive ebook web-app for teachers starting from the data and information collected in O1. Infographics style and data constituted the background for the interactive ebook web-app contents enriched by audios, videos, photo galleries and links to external resources. Ebook was made in a very friendly, ready-to-use, active and funny style. The NORADICA interactive web-app ebook for teachers can be considered an enhanced book-like experience, providing interaction with content, data, and resources offering a different path for exploration every time. The transferability of this output is very high taking into consideration the present evolution of the Eu teaching priority that progressively shift to a significant integration of ICT (and apps in particular) into school environment.
